

# Wanda Kudaj

I am an RN and Head Nurse Manager for Skilled Nursing at the Jewish Home of Rochester. I am 60 years old.

**Why I became a nurse:** I became a nurse because it was the most important and meaningful path for me. I worked as a RN in Poland in ICU then as a psychologist. I moved into long term care when I arrived to Rochester.

**What I love most about my job:** I enjoy working with people and the interaction with residents and seeing their smiles.

**A pivotal moment in my nursing career:** I have two: one from Poland when I was greeted by a former patient on a crowded Warsaw street stating "Thank you, you saved my life," and a few months ago when I received NYAHSAs Distinction Award after being nominated by the Director of Nursing.

**Best advice I've received related to nursing:** Each moment you learn something new from people that surround you. In nursing everything is a learning experience, and there are no stupid questions.

**Why I'd recommend nursing as a career:** People always need us and appreciate our help. You receive a lot of satisfaction quickly.
